MJTECH POINT OF SALE

Staff Guide

How to sell, open tabs and record expenses

For bar and wholesale staff · Keep this at the till

Your manager / owner:

Phone number:

Your login email:

Quick card: the 6 things you do every day

I want to…	Do this
Start work	Sign in. Check the bottom-left says **Shift Open**.
Sell something	Tap the item → **Pay Now** → pick Cash / Mobile Money / Card → **Complete Transaction**.
Keep a customer's tab	Add items → **Hold Bar Tab** → type the name → **Save & Open Tab**.
Pay a tab	**Open Bar Tabs** → **Close Out Tab** → **Pay Now**.
Record money going out	**Expenses** → amount → category → **Save expense**.
Finish work	Hand over cash to the owner, then tap **Sign out**.

Golden rules

1. Never share your password. Everything you sell is recorded under your name.
2. Ring every sale. Never sell without entering it.
3. Always **Sign out** when you leave the till.
4. If something looks wrong, do not guess. Call the owner.

1. Starting your shift

1. Open the app. You will see the sign-in screen.
2. Under **Workspace**, choose the place you are working: **Bar** or **Wholesale**.
3. Under **Sign in as**, choose **Staff**.
4. Type your **email** and **password**, then tap **Sign in**.

Look at the bottom-left of the screen. It shows your name and **Shift Open**. If it says **Shift Closed**, you cannot sell yet. Tell the owner to start the new shift.

> **Forgot your password?**
> If the app says **Wrong email or password**, check the spelling and that **Caps Lock** is off. If it still fails, tap **Forgot password?** or ask the owner to reset it for you.

2. Making a sale

1. **Find the item.** Tap it on the screen. You can also type in **Search items**, tap a category (All, Beer, Cocktail, Spirits), or scan the barcode.
2. **Choose the size** if the item has buttons: for example **+ Pint** or **+ Pitcher**, **+ Single** or **+ Double**.
3. The item appears on the **Active Order Ticket** on the right. Add more items the same way.
4. **Check the ticket.** Make sure the items and the **Total Due** are correct.
5. Tap **Pay Now**.
6. Choose how the customer pays: **Cash**, **Mobile Money** or **Card**.
7. Tap **Complete Transaction**. The sale is saved and a receipt shows on the screen.

Situation	What to do
Customer wants to change something before paying	On the ticket use **−** to take one away, or the bin icon to remove the line.
Item says **Out of Stock**	You cannot sell it. Tell the owner if you can see stock on the shelf.
Customer wants a table or name on the ticket	Type it in **Customer / Table Name** (optional).
Discount buttons (0% 10% 20%)	Use only if the owner allowed it. Leave on **0%** otherwise.
Phone or tablet is slow	Wait for the receipt before starting the next sale.

Wholesale: selling many at once

On the Wholesale device you often sell crates or cases. Do not tap many times.

1. Tap the item once so it is on the ticket.
2. Tap the **number** between the **−** and **+** buttons. Type the quantity, for example **30**, and press **Enter**.
3. The line total shows next to the price.

> **Bulk price**
> Some items get a cheaper price when you buy enough. The ticket shows **Bulk price applied** when it happens, or tells you how many more to buy. The price changes by itself. Do not change it.
> You cannot enter more than what is in stock.

3. Customer tabs (Bar)

A tab lets a customer drink now and pay later. Stock goes down when the tab is **paid**, not when it is opened.

Open a tab

1. Add the items to the ticket.
2. Tap **Hold Bar Tab**.
3. Type the **customer or table name**, for example John or Table 12.
4. Tap **Save & Open Tab**. The ticket clears and the tab is saved.

Add more later, then pay

1. Tap **Open Bar Tabs** in the menu.
2. Find the customer and tap **Close Out Tab**. The items move back onto the ticket.
3. Add anything new, then tap **Pay Now** and finish the sale.

> **Do not forget open tabs**
> Before you finish work, check **Open Bar Tabs**. Tell the owner about every tab that is still open.

4. Recording expenses

Use **Expenses** every time money leaves the business during your shift: ice, transport, gas, airtime, a casual worker, and so on.

1. Tap **Expenses** in the menu.
2. Type the **amount**.
3. Tap the **category** (for example Ice & Gas, Transport).
4. Choose **Paid from**:
   - **Cash from till** if you took it from the cash drawer.
   - **Mobile money** if paid from the business wallet.
   - **Owner / other** if the owner paid.
5. Add who was paid and a short note if you can. "Other" needs a note.
6. Tap **Save expense**.

> **Be honest about "Cash from till"**
> The owner counts the cash drawer at the end. If you took cash out and did not record it, the drawer will look **short** and it will be your shift that is questioned.

> **Not for stock**
> Do not record deliveries of drinks as an expense. The owner records deliveries under **Stock Tracking**.

Made a mistake? Tell the owner. Only the owner can cancel (void) an expense.

5. Looking up a sale

Tap **Sales & Refunds** to see this shift's sales. You can search by receipt number, item or customer name.

> **Refunds are done by the owner**
> If a customer wants money back, or you rang the wrong item, do **not** try to fix it yourself. Write down the receipt number, call the owner, and they will refund it. You will not see a Refund button. That is normal.

6. Stock and Calendar (view only)

- **Stock Tracking** shows how much is left. Items running low are marked. Tell the owner early so they can order.
- **Calendar** shows sales for each day. You cannot see costs or profit.
- You cannot change stock, prices or products. Only the owner can.
- Do not change **Cloud Sync** settings. The owner or developer looks after it.

7. Finishing your shift

1. Make sure every sale is entered and every expense is recorded.
2. Check **Open Bar Tabs** and tell the owner about any that are open.
3. Hand the cash drawer to the owner, or count it with them.
4. Tap **Sign out** (bottom-left of the screen).

You do **not** close the day. The owner does that.

8. Problems and what to do

Problem	What to do
I cannot sign in	Check the **Workspace** (Bar or Wholesale) and that **Staff** is selected. Check the email and password. Still failing? Ask the owner to reset your password.
Screen says **Shift Closed**	You cannot sell. Ask the owner to start a new shift.
No internet	Keep selling. The app saves on the device and sends the data when the internet comes back. Do not clear any data.
Item missing from the screen	Check you are on **All** and the search box is empty. If it is still missing, tell the owner.

Problem	What to do
Wrong item sold or wrong amount	Do not sell again to "fix" it. Call the owner and give the receipt number.
Customer wants a printed receipt	Tap **Print** on the receipt. If nothing prints, tell the owner.
The side menu looks cut off	Scroll the menu. **Sign out** is always at the bottom-left.
Something strange happened	Do not tap **Clear saved data**. It erases the saved information on this device. Call the owner.

> **Never tap "Clear saved data"**
> It is the small link at the very bottom of the menu. It deletes everything saved on this device that has not been sent to the cloud.
